# Aluminum Windows&Doors

Aluminum windows:aluminum windows open type can be sliding,casement,awning ,single hung,and bi-fold,etc.Each window type has its own characteristics. For example, the casement window has good ventilation, good airtightness, sound insulation, heat preservation. The advantages of sliding windows are simplicity, wide vision, high lighting rate, flexible use, and safety,and have long service life.

Aluminum door: Our aluminum profile are strong and durable, and with many thickness and width to choose from. Glass can be free to match, colorful, catchy, elegant and full of modern sense. Open type can be sliding, swing and bi-fold. It has a compact structure with good air tightness, water tightness,heat&sound insulation effect,also a strong anti-wind and impact ability.
